

Safety Instruction for Grease, Food Waste and Domestic Waste Recycling Container **FATBOXX[®] + FATBOXX[®] max**

Read these instructions carefully before operating!

1. Safety Instructions

1.1. Filling with Hot Grease

When filling with hot grease, it is essential to observe the following instructions:

⚠ WARNING You can get serious burns when filling with the grease.

The FATBOXX/FATBOXXmax may only be filled with hot grease with a maximum temperature of 230°F /110°C.

⚠ WARNING If you use grease hotter than 230°F /110°C, the container can become damaged and you can get serious burns.

1.2. Further Health and Safety Information

- **⚠ DANGER** Do not close the container when people or animals are in the container, as the container is airtight and would otherwise suffocate them.
- Do not let children play with or near the container.
- Never sit or stand on the container. It could tip over.
- Always use the handle for transport, and note that full containers can be very heavy and could tip over.
- FATBOXX/FATBOXXmax must only be moved and transported with the cover tightly closed.
- **⚠ CAUTION** Do not close the container cover while your hand is on the edge of the container. If the container lid falls, your fingers could be injured.
- Do not place the FATBOXX/FATBOXXmax near fireplaces or other sources of heat. It could be damaged.
- Check the FATBOXX/FATBOXXmax regularly for damage. If the container is visibly damaged, it must be replaced.
- FATBOXX/FATBOXXmax is not suitable for purposes other than the collection of grease, food waste and domestic waste.

2. Assembly of the Container

Please follow the given steps to install the axles and wheels on the container before usage:

- Insert the first wheel into the axle till you hear a clicking sound.
- Mount the axle-wheel structure to the bottom of the container using the axle holder.
- Insert the second wheel on to the other side of the axle as mentioned above
- Please make sure that the wheels are securely placed before using the container.

Safety Instruction for Grease, Food Waste and Domestic Waste Recycling Container **FATBOXX® + FATBOXX® max**

3. Opening the lid

- Position yourself in front of the FATBOXX /FATBOXXmax and grasp the handle.
- Push the lid in the downward direction with one hand and move the clip in the outward direction with the other hand to facilitate the opening of the lid.
- Repeat the procedure as mentioned above at the second handle of the container.
- The lid can now be fully opened from both ends.

See Figure 1.

Figure 1

4. Closing the Cover

- Position yourself in front of the FATBOXX/FATBOXXmax and grasp the handle.
- Press the lid in the downward direction with one hand and move the clip in the inward direction with the other hand to facilitate the closing of the lid.
- Repeat the procedure as mentioned above at the second handle of the lid

Note: Please ensure the firm closure of the lidlocks after filling of the FATBOXX/FATBOXXmax when it is being used as an animal resistant bin.

See Figure 2.

Figure 2

5. Moving the Container

Standing behind the FATBOXX/FATBOXXmax, grasp the container by the handle and tilt the container slightly backward.

CAUTION The container can fall if it tips over too far. You could injure yourself, as the filled container can be very heavy.

6. Transporting the Container

During transport, FATBOXX/FATBOXXmax must always be tightly closed. The containers must be well secured, they can shift and fall during transport.
