

# Safety Instruction for Used Cooking Oil, Food Waste, and Domestic Waste Recycling Container **FATBOXX® + FATBOXX® max**

**Read these instructions carefully before operating the container**

## 1. Safety Instructions

### 1.1. Filling in with hot used cooking oil

When filling in with hot used cooking oil, it is essential to follow the instructions below.

**⚠️ WARNING** There is a danger of serious burns when filling with hot used cooking oil.

The FATBOXX/FATBOXXmax can be filled with hot oil up to a maximum temperature of 110 °C (230 °F).

**⚠️ WARNING** Usage of oil hotter than 110 °C (230 °F) leads to serious burns and damage of the container.

### 1.2. Further Health and Safety Information

- Sitting and standing on the container leads to tipping hazard.
- Always use the handle for transport. (Note: Full containers are heavy and could lead to tipping hazard)
- Please transfer the FATBOXX/FATTBOXXmax only with the tightly secured lid.
- Do not place the FATBOXX/FATBOXXmax near fireplaces and other sources of heat to prevent container damage.
- Check the FATBOXX/FATBOXXmax regularly for damage. In case of visible damage, please replace the containers.
- The FATBOXX/FATBOXXmax is not suitable for purposes other than the collection of oil, food waste, and domestic waste.

## 2. Assembly of the Container

Please follow the given steps to install the axles and wheels on the container before usage:

- Insert the first wheel into the axle till you hear a clicking sound.
- Mount the axle-wheel structure to the bottom of the container using the axle holder.
- Insert the second wheel on to the other side of the axle as mentioned above
- Please make sure that the wheels are securely placed before using the container.

## 3. Opening the lid

- Position yourself in front of the FATBOXX /FATBOXXmax and grasp the handle.
- Push the lid in the downward direction with one hand and move the clip in the outward direction with the other hand to facilitate the opening of the lid.
- Repeat the procedure as mentioned above at the second handle of the container.
- The lid can now be fully opened from both ends.

See Figure 1.

Figure 1

## 4. Closing the Cover

- Position yourself in front of the FATBOXX/FATBOXXmax and grasp the handle.
- Press the lid in the downward direction with one hand and move the clip in the inward direction with the other hand to facilitate the closing of the lid.
- Repeat the procedure as mentioned above at the second handle of the lid

**Note:** Please ensure the firm closure of the lidlocks after filling of the FATBOXX/FATBOXXmax when it is being used as an animal resistant bin.

See Figure 2.

Figure 2

## 5. Moving the **FATBOXX® + FATBOXX® max**

Position yourself behind the FATBOXX/FATBOXXmax and grasp the bin by the handle to tilt the container at an angle in the backward direction to move it. **Note:** Tipping and health hazard due to the weight of the container.

## 6. Transport of **FATBOXX® + FATBOXX® max**

Please secure the FATBOXX/FATBOXXmax from movements during transport to avoid tipping hazards.
